Discord for Scrabble®

Technical Guide

Creating a Discord User Account

Visit <u>Discord</u> at <u>https://discordapp.com</u> You'll be taken to the following webpage:

Click the button "Open Discord in your browser" - you'll be prompted to enter a Username. You may wish to consider using either your real name or your ISC username, to help make yourself identifiable to the other members of your group.

Verify your Account

After signing up for a Discord account, a verification e-mail will be sent to the e-mail address you used during account creation. Be sure to click the verification link in that e-mail so that you may proceed:

Creating a Discord Server

After proceeding through a captcha verification, you'll arrive at a screen prompting you to create a server. Instead of using of of the provided templates, select "Create my own". This will bring you to a modal dialog to create your server.

Enter your server name – if you wish, you may also upload an image at this point as well. The suggested server region should be left alone – Discord will choose the best one for you automatically.

By creating a se	rver, you will h	ave access to free
voice and text c	hat to use amo	ongst your friends.
SERVER NAME		
CalgaryScrabble		
SERVER REGION		С
US West	Change	
By creating a convert you arrea to (Discordia	Minimum Size: 128x128
By creating a server, you agree to I Community Guidelines.	JISCORD'S	

Welcome to your Server!

At this point, you will be brought to a welcome page – there are several options that appear in the middle of the screen – please pay particular attention to the first one – Learn about Discord. The application itself will call your attention to various parts of the page as you set up.

WELCOME TO YOUR SERVER, RODWEIS!				
8	Learn about Discord at your own pace by exploring the floating quest indicators.			
ß	Customize your server with an awesome name and icon to make it unique.			
0+0	Invite your friends to this server by clicking on a share button when you're ready.			
Ē	Download the desktop app for system-wide Push to Talk, lower CPU and bandwidth usage, and more.			
	Stay connected to your server from your smartphone and even use Discord while console gaming.			
IJ	Reach us via our help desk or on Twitter @discordapp if you have any questions or need help.			

Creating Channels

Discord uses the concept of channels to keep conversations separated and contextual. Channels are normally created for text (i.e. your users are typing messages back and forth to eachother). Voice-only channels may be created for real-time voice communication as well. Here's an example of creating a channel on the Calgary server:

CREATE TEXT CHANNEL in Text Channels			
CHANNEL TYPE			
🖌 # Text Channel			
Voice Channel			
thursdaynightscrabble			
	Cancel	Create Channel	
		na el e genting	

Once created, users may be added to channels or join them as they wish.

Channels may be further configured in settings – here's a screenshot of the types of options you have when editing a channel:

# THURSDAYNIGHTSCRABBL	OVERVIEW	(\mathbf{x})
Overview	CHANNEL NAME	
Permissions	thursdaynightscrabble	
Invites		
Webhooks		
Delete Channel	Common chat room for Thursday night scrabble events. Registration begins at 6:30pm, play begins at 7:00pm. 915	
	Off 5s 10s 15s 30s 1m 2m 5m 10m 15m 30m 1h 2h 6h	
	Members will be restricted to sending one message per this interval, unless they have Manage Channel or Manage Messages permissions.	
	NSFW Channel	
	Users will need to confirm they are of over legal age to view in the content in this channel. NSFW channels are exempt from the explicit content filter.	

Inviting other users to your Discord server

Discord is only useful once you have a community to make use of it. From the main screen, click the "Invite People" button in the top of the left-hand sidebar. This will bring you to a new screen where you can create a shareable invitation link that can be sent to your members:

INVITE FRIENDS TO CALGARYSCRABBLE	×
Share this link with others to grant access to your server!	
https://discord.gg/Mbmt7C	Сору
Your invite link expires in 1 day.	Link Settings
Set this link to never expire	

You may configure several options for your links when creating them by clicking the Link Settings gear. It is wise to put some restrictions on your links, to avoid having your server being joined by random accounts. Examples of invitation link restrictions include number of uses until it expires, expiration by time, and so on.

Creating Roles

The creator of the server is given Administrator powers – basically, they are empowered to do anything at all with the server. New users are granted the "Everyone" role – a general role that doesn't include any special permissions. It's a useful idea to create other "Roles" - in the Calgary club, we have created a Director role that includes the ability to post messages in certain channels, etc.

Once created, Roles can be assigned to members by selecting Members in the User Management section in the left sidebar of the above image.

Where do I find Settings?

Most settings can be found in the drop-down menu in the top-left sidebar: click the arrow to the right of your server name, and you'll see the following menu:

Where do we go from here?

There is no practical limit to how much you can do with a Discord server. A couple of the Calgary members are programming a bot that assists with tournament pairing and standings as well as give word quizzes and provide definitions (in a separate channel to avoid clutter).

There has already been a spirit of freely sharing discoveries among clubs that have taken the leap to use Discord to organize club play during this time. Thanks to everyone who has been involved in helping others get up and running.
